

Latest Information

The presentation slides of the following keynotes are now available:

- Richard Winter with Pekka Kostamaa (Presenter): [Large Scale Data Warehousing: Trends and Observations](#) (PowerPoint)
- Donald Kossmann: [How new is the cloud?](#) (PowerPoint)

ICDE 2010 Best Paper Award 🏆

TASM: Top-k Approximate Subtree Matching

Nikolaus Augsten (Free University of Bolzano), Denilson Barbosa (University of Alberta), Mike Boehlen (Free University of Bolzano), Themis Palpanas (University of Trento)

ICDE 2010 Best Student Paper Award 🏆

Usher: Improving Data Quality With Dynamic Forms

Kuang Chen (UC Berkeley), Harr Chen (Massachusetts Institute of Technology), Neil Conway (UC Berkeley), Joseph M. Hellerstein (UC Berkeley), Tapan Parikh (UC Berkeley)

Data Engineering deals with the use of engineering techniques and methodologies in the design, development and assessment of information systems for different computing platforms and application environments. The 26th IEEE International Conference on Data Engineering will continue in its tradition of being a premier forum for presentation of research results and advanced data-intensive applications and discussion of issues on data and knowledge engineering. The mission of the conference is to share research solutions to problems of today's information society and to identify new issues and directions for future research and development work.
